

# Charles Puelz

email: [charles.puelz@gmail.com](mailto:charles.puelz@gmail.com)

website: [cpuelz.github.io](http://cpuelz.github.io)

University of North Carolina, Chapel Hill  
Department of Mathematics  
120 E Cameron Ave, CB #3250  
329 Phillips Hall  
Chapel Hill, NC 27599

(updated: January 22, 2018)

## Professional Appointments

- Assistant Professor/Courant Instructor, Courant Institute of Mathematical Sciences, New York University, September 2018–
- Postdoctoral Research Associate, Mathematics, University of North Carolina, Chapel Hill, July 2017–  
advisor: Boyce Griffith

## Experience

- Graduate Research Assistant, Computational and Applied Mathematics, Rice University, August 2011–May 2017.
- Undergraduate Research Assistant, Mathematics, Massachusetts Institute of Technology, Summer 2010.  
advisor: Laurent Demanet
- Undergraduate Research Assistant, Max Planck Institute for Dynamics and Self-Organization, Summer 2009.  
advisor: Tsampikos Kottos

## Education

- Ph.D. in Computational and Applied Mathematics, Rice University, Houston, TX, May 2017  
title: *Numerical methods and applications for reduced models of blood flow*  
advisors: Beatrice Riviere and Craig G. Rusin
- M.A. in Computational and Applied Mathematics, Rice University, Houston, TX, May 2013  
title: *Improved spectral calculations for discrete Schrödinger operators*  
advisor: Mark Embree
- B.A. in Mathematics and B.A. in Physics, Wesleyan University, Middletown, CT, May 2011  
Phi Beta Kappa and honors in mathematics

## Journal Articles

1. “A computational study of the Fontan circulation with fenestration or hepatic vein exclusion.” C. Puelz, S. Acosta, B. Rivière, D. Penny, K. Brady, C.G. Rusin. *Computers in Biology and Medicine*, 89, pp. 405–418, 2017.
2. “Cardiovascular mechanics in the early stages of pulmonary hypertension: a computational study.” S. Acosta, C. Puelz, B. Rivière, D. Penny, K. Brady, C.G. Rusin. *Biomechanics and Modeling in Mechanobiology*, 2017.
3. “A priori error estimates of Adams-Bashforth discontinuous Galerkin methods for scalar nonlinear conservation laws.” C. Puelz, B. Rivière. *Journal of Numerical Mathematics*, 2017.
4. “Convergence of IPDG for coupled time-dependent Navier–Stokes and Darcy equations.” N. Chabaane, V. Girault, C. Puelz, B. Rivière. *Journal of Computational and Applied Mathematics*, 324, pp. 25–48, 2017.
5. “Comparison of reduced blood flow models using Runge–Kutta discontinuous Galerkin methods.” C. Puelz, S. Čanić, B. Rivière, C.G. Rusin. *Applied Numerical Mathematics*, 115, pp. 114–141, 2017.

6. “Numerical method of characteristics for one-dimensional blood flow.” S. Acosta, C. Puelz, B. Rivière, C.G. Rusin, D. Penny. *Journal of Computational Physics*, 294, pp. 96-109, 2015.
7. “Spectral approximation for quasiperiodic Jacobi operators.” C. Puelz, M. Embree, J. Fillman. *Integral Equations and Operator Theory*, 82(4), pp. 533-554, 2015.

## Theses and Technical Reports

1. *Numerical methods and applications for reduced models of blood flow*, PhD Thesis, Rice University, 2017.
2. *Improved spectral calculations for discrete Schrödinger operators*, Masters Thesis, Rice University, 2013.
3. “Visualizing the Pareto Surface.” B. Hosseini, G. Liu, C. Puelz, S. Tracht, M. Smilovic. *IMA Preprint Series* 2401, 2012.

## Computer Skills

- Computer Languages: FORTRAN, C, C++
- Tools: SVN, Emacs, Git, Eclipse, netbeans, MATLAB
- Experience with: Python

## Honors and Awards

- Alan Weiser Memorial Travel Award, Rice CAAM department, April 2016.
- National Library of Medicine training fellowship through the Gulf Coast Consortia for the Quantitative Biomedical Sciences, awarded 2014, renewed 2015 and 2016.
- Honorable Mention in the National Science Foundation GRFP competition, April 2013.
- SIAM Student Chapter Certificate of Recognition, April 2013.
- Rae Shortt Prize, Wesleyan math department, April 2010.
- Robertson Math Award, Wesleyan math department, April 2009.

## Teaching and Mentoring

- Teaching assistant for matrix analysis and numerical PDE, Rice University, Fall 2014, Spring 2015.  
Held weekly recitation sessions and office hours.
- Lab instructor for matrix analysis lab, Rice University, Spring 2013.  
Organized experiments for students interested in exploring linear algebra concepts within a hands-on setting. Students enrolled in this lab while concurrently taking a sophomore/junior level linear algebra course.
- Rice Learning assistant (RLA), Rice University, Fall 2012.  
Held a weekly interactive lab section for students. We worked through Matlab implementations of concepts introduced in the lecture portion of the class. This position included a pedagogy course which brought RLAs together for a discussion about effective pedagogical strategies for conveying course content.
- Teaching Assistant, Tutor, and Grader, Wesleyan University, Spring 2008–Spring 2011.

## Service

- Co-organizer of minisymposium at the 42nd SIAM Southeastern Atlantic Section Conference titled “Cardiovascular Modeling and Simulation.” March 9–11, 2018.
- Co-organizer of the Applied Mathematics Colloquium in the UNC–CH Mathematics Department, 2017–2018.
- Co-organizer of an AMS minisymposium at the Joint Mathematics Meeting. Minisymposium titled “Mathematics in Physiology and Medicine.” January 5, 2017.

- Speaker at “Rice Summer Math Days,” a summer program for high school students interested in studying mathematics, June 2015.
- SIAM student chapter president, Rice University, 2012–2013.

## Conferences and Workshops

- Finite Element Rodeo, University of Houston, Houston, TX, March 3–4, 2017.
- Joint Mathematics Meeting, Atlanta, GA, January 4–7, 2017.
- SIAM Life Sciences, Boston, MA, July 11–14, 2016.
- National Library of Medicine Informatics Training Conference, Ohio State University, Columbus, OH, June 27–28, 2016.
- AMS MRC: Mathematics in Physiology and Medicine, Snowbird Resort, Snowbird, UT, June 19–25, 2016.
- Finite Element Rodeo, Texas A&M University, College Station, TX, March 4–5, 2016.
- AMIA Annual Symposium, San Francisco, CA, November 14–18, 2015.
- 25th Keck Annual Research Conference, Bioscience Research Collaborative, Houston, TX, October 15–16, 2015.
- National Library of Medicine Informatics Training Conference, National Institutes of Health, Bethesda, MD, June 23–24, 2015.
- Advanced Numerical Methods in the Mathematical Sciences, Texas A&M University, College Station, TX, May 4–7, 2015.
- Finite Element Rodeo, Southern Methodist University, Dallas, TX, February 27–28, 2015.
- Joint Mathematics Meeting, San Antonio, TX, January 10–13, 2015.
- National Library of Medicine Informatics Training Conference, University of Pittsburgh, Pittsburgh, PA, June 17–18, 2014.
- 24th Keck Annual Research Conference, Bioscience Research Collaborative, Houston, TX, November 7, 2014.
- Gene Golub SIAM Summer School on Numerical Linear Algebra, Fudan University, Shanghai, China, July 22–August 9, 2013.
- Recent Advances in Harmonic Analysis and Spectral Theory, Texas A&M University, College Station, TX, August 6–10, 2012.
- Mathematical Modeling in Industry XVI, University of Calgary, Calgary, Alberta, July 18–27, 2012.

## Presentations

1. “Discretizations of 1D blood flow models and an application to the Fontan physiology”  
Virginia Tech Numerical Analysis Seminar, Blacksburg, VA, November 1, 2017.
2. “One dimensional vessel network models for studying abnormal physiologies”  
University of North Carolina Department of Mathematics Applied Mathematics Colloquium, Chapel Hill, NC, September 2017.
3. “Numerical methods for blood flow”  
Rice CAAM department graduate colloquium, Houston, TX, March 2017.
4. “Reduced models for blood flow”  
Finite Element Rodeo, University of Houston, Houston, TX, March 2017.
5. “One-dimensional blood flow models: analysis and applications”  
SIAM Life Sciences, Boston, MA, July 2016.

6. “Discontinuous Galerkin discretizations of one-dimensional blood flow models”  
Finite Element Rodeo, Texas A&M University, College Station, TX, March 2016.
7. “Numerical methods for reduced blood flow models”  
National Institute of Standards and Technology, Gaithersburg, MD, June 2015.
8. “Discontinuous Galerkin methods for reduced blood flow models”  
Finite Element Rodeo, Southern Methodist University, Dallas, TX, May 2015.
9. “An  $O(N^2)$  eigenvalue algorithm for period- $N$  Jacobi operators”  
Joint Mathematics Meeting, San Antonio, TX, January 2015.
10. “Spectra of Schrödinger operators via transfer matrices”  
Rice CAAM department graduate colloquium, Houston, TX, January 2014.
11. “Electrical networks and Polya’s theorem”  
Rice CAAM department graduate colloquium, Houston, TX, January 2012.
12. “Random walks and electrical networks”  
Wesleyan math department senior honors presentation, Wesleyan University, Middletown, CT, April 2011.
13. “Oil drilling and mathematics”  
Wesleyan math department undergraduate colloquium, Middletown, CT, February 2011.

## Posters

1. “One-dimensional model of blood flow discretized with Runge–Kutta discontinuous Galerkin methods”  
SIAM Life Sciences, Boston, MA, July 2016.
2. “Computational modeling of hypoplastic left heart syndrome for improved decision support”  
NLM Informatics Training Conference, Ohio State University, Columbus, OH, June 2016.
3. “Mathematical modeling of congenital heart defects and abnormal hemodynamic physiologies”  
Sigma Xi (Rice and TMC chapter) holiday event, Houston, TX, December 2015.
4. “Blood flow model for improved decision support”  
AMIA Annual Symposium, San Francisco, CA, November 2015
5. “A closed-loop reduced hemodynamic model for the simulation of blood flow in patients with hypoplastic left heart syndrome”  
25th Keck Annual Research Conference, Bioscience Research Collaborative, Houston, TX, October 2015.
6. “Discontinuous Galerkin methods for reduced blood flow models”  
Advanced Numerical Methods in the Mathematical Sciences conference, Texas A&M University, College Station, TX, May 2015.
7. “Numerical methods for one-dimensional blood flow”  
poster at the Keck Annual Research Conference, Bioscience Research Collaborative, Houston, TX, November 2014.
